Md Kasif Uddin

Software Engineer | AI Engineer | Full-Stack Developer

Bihar, India | mdkasifuddin123@gmail.com | github.com/MdKasif0 | x.com/md_kasif_uddin

PROFESSIONAL SUMMARY

Software Engineer and AI Engineer with strong experience building modern web applications, AI-powered products, interactive simulations, and automation tools. Passionate about creating high-performance, visually polished applications using JavaScript, Python, Firebase/Supabase, and modern AI APIs. Experienced in taking production-ready products from concept to deployment, with a strong focus on user experience, performance, and scalability.

TECHNICAL SKILLS

Languages
JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend
React, Next.js, Tailwind CSS, Responsive Design, PWA

Backend
Firebase, Supabase, Node.js, REST APIs, Netlify Functions

AI & Machine Learning
OpenAI API, Gemini API, Groq API, LLM Integration, Prompt Engineering, TensorFlow, Pandas, Scikit-learn

Tools & Workflow
Git, GitHub, VS Code, Google Antigravity (agentic IDE), MCP Agent Workflows, Vercel, Netlify, Figma

SELECTED PROJECTS

iWriteTech — Premium Tech & Gadget Affiliate Platform

Built and deployed a modern, SEO-optimized affiliate blog for tech gadgets and desk setups, with a full custom brand identity, MDX-based content system, an in-house affiliate-link generator, and Rainforest API integration for live Amazon product data. Optimized for Core Web Vitals and dual-market (US/India) affiliate monetization.

Next.js • TypeScript • Netlify • MDX • Amazon Associates API

ReleaseStack — AI Outreach Automation Platform

Designed and built a single-admin platform that uses AI to automate startup launch promotion on X, from content generation to scheduled outreach, backed by a Postgres database and transactional email delivery.

Next.js 14 (App Router) • Supabase • Groq API • Resend • shadcn/ui • Netlify

AI-Powered News Platform

Developed a news platform with personalized AI recommendations, offline reading, Firebase authentication, and cloud storage, delivered as a responsive Progressive Web App.

Next.js • Firebase • AI APIs • Tailwind CSS

Automated Data Extraction Pipeline

Built a browser-automated scraping workflow to extract structured product-launch data at scale, parsing and exporting clean, dated datasets for downstream analysis.

Browser Automation • Python • Structured Data Extraction

Interactive Scientific Simulations

Built a series of browser-based scientific simulations — including Big Bang expansion, star formation, cell division, and black hole gravitational lensing — with realistic physics and cinematic, high-performance rendering.

JavaScript • Canvas/WebGL • Physics Simulation

Multi-Model AI Chat Application

Developed an AI chatbot supporting multiple language models with persistent conversation history, markdown rendering, and streaming responses in a modern UI.

JavaScript • LLM APIs • Streaming UI

EXPERIENCE

Freelance Software Developer

2024 – Present

- Designed and deployed full-stack web applications end-to-end, from architecture to production deployment.
- Built AI-powered tools for productivity, content generation, and workflow automation.
- Developed responsive, accessible user interfaces using modern frontend frameworks.
- Integrated third-party APIs and cloud services (auth, storage, payments, email, affiliate data).
- Adopted agentic AI development workflows (MCP-based tooling) to accelerate delivery without compromising code quality.

EDUCATION

B.E./B.Tech, Computer Science & Engineering — Chandigarh University, India

Higher Secondary — Science & Mathematics

ACHIEVEMENTS

- Shipped multiple production-ready AI web apps
- Built numerous interactive simulations
- Active technology creator online

STRENGTHS

Full-Stack Development • AI Application Development • Clean UI Design • Performance Optimization • API Integration • Rapid Prototyping • Software Architecture • Problem Solving
